## DETAILED ACTION

### *Claim Rejections - 35 USC § 102*

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 14-25 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Mills (2,778,000). Mills has connectors (bolts 31, 36, 64, 68) and wires (inherent feature) connecting the power to the bolts, a reinforcement element (75, 79, 62, 70), each conductive element is insulated from the cabinet and door (32, 39, 61), and any part drawn from the “conductive hinge for refrigerator door” of Mills, including the butt portion, the leaf portion, the fasteners, the connecting wire and pin, is considered a **hinge portion** of the hinge. Mills meets all limitations as claimed.

### *Conclusion*

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
